## Part III: Reading / Comprehension

I Read the text and answer according to the instructions. [18 points]

**Benjamin Franklin 1706 – 1790, author, inventor, scientist, politician, diplomat**

Benjamin Franklin was one of the most important Americans in history.

As a boy Ben was very successful at the Boston Latin School but at the age of 10 his father took him from there to help him make candles. The work with wax was not good at all for Ben, so he changed to his brother's printing and newspaper business, when he was 14. His brother James gave him a very hard treatment and didn't print any of Ben's writing. Ben took on the name Mrs Silence Dogood and like that published 14 imaginative and witty letters a lot of readers liked.

In the early part of his life, Franklin was a business person and inventor. He ran the Pennsylvania Gazette (a newspaper) and also published Poor Richard's Almanac. Poor Richard's Almanac was very popular because it made predictions about the future and had wise sayings. Ben Franklin also

invented the Franklin stove, lightning rod, bifocals (eyeglasses), and started America's first library. He is probably best known for his kite experiment which proved electricity could be harnessed from lightning.

In the later part of his life, Franklin became interested in politics. He spent many years in England before coming back to America. In 1776, Franklin helped Thomas Jefferson write the Declaration of Independence. Two years later, he went to France and convinced the French to help America in the war against England. After the war, Franklin joined the Continental Congress and signed the Constitution. He died in 1790. Today, Ben Franklin is honoured on the \$100 dollar bill. His name is honoured on highways, schools, and businesses across America.
